

BENJIE MAYBUENA

FULL-STACK WEB DEVELOPER

✉ maybuena.work@gmail.com | 🌐 maybuena-portfolio.netlify.app | 📄 github.com/maybuena29

A seasoned Full-stack Web Developer with extensive experience in creating diverse websites utilizing a range of programming languages and frameworks.

PROFESSIONAL EXPERIENCE

Backend Web Developer | ThinkBIT Solutions

Feb 2025 - Present

- Translate business requirements into scalable backend solutions by designing and developing Laravel-based components aligned with established coding standards and best practices.
- Participate in project planning, technical design, and estimation while proactively identifying risks and recommending appropriate technical solutions.
- Design and execute unit, integration, and system tests, ensuring timely defect resolution and maintaining high application reliability.
- Support DevOps initiatives by contributing to CI/CD pipelines, automation (ATDD/TDD), and continuous system monitoring to improve deployment efficiency and code quality.

Web Developer | 8ENERGY IT Solutions Inc.

Jul 2023 - Nov 2024

- Led a team in a continuous development of an ERP system for the client.
- Designed and developed web solutions to meet client needs and industry standards, while providing ongoing support for implementation and utilization of the systems.
- Collaborated with cross-functional teams to deliver high-quality, user-centric websites that effectively met client objectives and enhanced user experience.

Intern – Office Aide | Schools Division Office

Mar 2023 - May 2023

- Participated in creating an Information System using Laravel Framework for HR Non-Teaching Personnel.

EDUCATION

Bachelor of Science in Information Technology - Tertiary

2019 - 2023

STI College Muñoz-EDSA

- Magna Cum Laude & Batch Valedictorian
- Thesis on "Pharma-Mediko: A Web-Based Ordering System and Point of Sale with Mobile Application for CoruMed Pharmacy".
- Local Champion in Codefest 2019

IT in Mobile Application and Web Development - SHS

2017 - 2019

STI College Muñoz-EDSA

- Studied IT with a focus on Mobile Application and Web Development at STI College Muñoz-EDSA during Senior High School.

PROJECTS

Loyalty Program Management System

June 2025 - Present

PHP Laravel | Unit Testing | MySQL | Git | RESTful API | JIRA | Postman | Python | CI/CD Pipeline

- Delivered backend architecture for a customer loyalty and product registration platform, enabling scalable promo management, points tracking, and reward redemption across web and mobile systems.

TBE: Onsite

July 2025 - Present

PHP Laravel | Unit Testing | MySQL | Git | RESTful API | JIRA | Postman | CI/CD Pipeline

- Built an event operations backend system with QR-based check-in, real-time registration validation, and automated reporting to streamline on-site attendee management.

TBE: Pre-registration

Feb 2026 - Present

PHP Laravel | Unit Testing | MySQL | Git | RESTful API | JIRA | Postman | CI/CD Pipeline

- Engineered a flexible pre-registration platform with dynamic workflows and automated, client-tailored email notifications to enhance event onboarding efficiency.

Sept 2025 - Dec 2025

- Contributed to a comprehensive project management platform by enhancing backend modules for tracking, reporting, and training systems, improving operational visibility and user productivity.

March 2025 - June 2025

- Supported backend development of a large-scale hotel ecosystem covering bookings, loyalty programs, kiosks, promos, vouchers, and real-time services, ensuring system reliability and performance.

Aug 2025

- Led backend development of a disaster monitoring system with real-time heatmap visualization, enabling accurate geospatial reporting and actionable insights.

Aug 2023 - Oct 2024

- Developed an automation system to streamline and optimize the client's overall business processes, enhancing efficiency and reducing manual effort.

Nov 2023

- Built a raffle system to automate participant management, random selection, and result generation, ensuring fairness and efficiency.

Apr 2023 - May 2023

- Developed an information system to centralize data management, improve accessibility, and streamline organizational processes of schools.

Sep 2022 - Jan 2023

- Designed and implemented an integrated ordering and inventory management system with POS integration and automated product expiration alerts, improving stock accuracy, reducing waste, and streamlining overall business operations.
